CONTENTS

Volume 106, Number 1, May 14, 1982

AUTHOR INDEX, Volume 106, Number 1, May 14, 1982 ii

ANNETTE VIGNY and JEAN-PIERRE HENRY. Mechanism of Tyrosine Hydroxylase Activation by Phosphorylation 1

PHILIPPE DURAND, ANNE-MARIE CATHIARD, and JOSE M. SAEZ. *In Vitro* Maturation of Ovine Fetal Adrenal Cells Adenylate Cyclase: Corticotropin-Dependent and -Independent Development of the Response to Corticotropin 8

GUY G. ROUSSEAU, CHARLES C. VAN BOHEMEN, SYLVAIN LAREAU, and JACQUES DEGELAEN. Submicromolar Free Calcium Modulates Dexamethasone Binding to the Glucocorticoid Receptor 16

SHU-I TU, HOWARD HUTCHINSON, and JAMES R. CAVANAUGH. Interaction between Gramicidin-A and Bacteriorhodopsin in Reconstituted Purple Membrane 23

DANIEL MANSUY, PIERRETTE BATTIONI, JEAN-PIERRE MAHY, and GERMAIN GILLET. Comparison of the Hemoglobin Reactions with Methyl- and Phenyl-hydrazine: Intermediate Formation of a Hemoglobin Fe(II)–Methyldiazene Complex 30

A. JORDA, M. GOMEZ, J. CABO, and S. GRISOLIA. Effect of Streptozotocin Diabetes on Some Urea Cycle Enzymes 37

CHI V. DANG. High Molecular Weight Complex Formation of Rat Liver Lysyl–tRNA Synthetase Reduces Enzyme Lability to Thermal Inactivation 44

NIRMALA SUNDARRAJ, JUDITH MARTIN, and NANCY HRINYA. Development and Characterization of Monoclonal Antibodies to Human Type III Procollagen 48

SEYMOUR I. SCHLAGER. Ability of Tumor Cells to Resist Humoral vs Cell-Mediated Immune Attack Is Controlled by Different Membrane Physical Properties 58

AKIRA SUZUKI, JEAN-PIERRE JACQUOT, FRANCIS MARTIN, and PIERRE GADAL. Light-Dependent Activity of Glutamate Synthase *in Vitro* 65

CHR.-U. RUGEVICS and H. WITZEL. Hydrolysis of Phosphoric Acid Diesters by Snake Venom Phosphodiesterase and 5′-Nucleotide Diesters of *Sinapis alba* Germs via a Covalently Enzyme-Bound Intermediate 72

E. VAN OBBERGHEN-SCHILLING, R. PEREZ-RODRIGUEZ, and J. POUYSSEGUR. Hirudin, a Probe to Analyze the Growth-Promoting Activity of Thrombin in Fibroblasts; Reevaluation of the Temporal Action of Competence Factors 79

N. MUNSCH, H. RAUX, M. C. FONDANECHE, and P. BURTIN. Evidence of a Phosphorylated Protein Specific of Human Colon Carcinoma Cells 87

Z. DEYL, M. HORAKOVA, M. ADAM, and K. MACEK. Variations in Aortal Elastin Composition after Atherogenic Diet Feeding in Rats. Possible Involvement of Two Different Elastin Types 94

BERNARD LAINE, DENISE BELAICHE, PIERRE SAUTIERE, and GERARD BISERTE. Characterization and Structural Study of the DNA-Binding Protein HRm from *Rhizobium meliloti* 101

J. C. BIZEC, J. KLETHI, and P. MANDEL. Cyclic Guanosine 3′5′ Phosphate, Guanylate Cyclase and Cyclic Guanosine Phosphodiesterase in the Eye Lens 108

KOICHI KAWASAKI and MITSUKO MAEDA. Amino Acids and Peptides. II. Modification of Glycylglycine Bond in Methionine Enkephalin 113

LARRY MILLER, JAMES COPPEDGE, and EMIL REISLER. The Reactive SH_1 and SH_2 Cysteines in Myosin Subfragment 1 Are Cross-Linked at Similar Rates with Reagents of Different Length 117

M. VOLPI, P. H. NACCACHE, and R. I. SHA'AFI. Preparation of Inside-Out Membrane Vesicles from Neutrophils Capable of Actively Transporting Calcium 123

TOSHIRO HARA, KEIKICHI TAKAHASHI, MIKIO YAMAMOTO, HIROSHI KISAKI, and HIDEYA ENDO. Polyamines Alter the Phosphorylation Pattern of Chromatin Proteins by Endogenous Protein Kinases 131

ABBAS RASHIDBAIGI and ARNOLD E. RUOHO. Photoaffinity Labeling of β-Adrenergic Receptors: Identification of the β-Receptor Binding Site(s) from Turkey, Pigeon, and Frog Erythrocyte 139

F. AURICCHIO, A. MIGLIACCIO, G. CASTORIA, S. LASTORIA, and A. ROTONDI. Evidence That *in Vivo* Estradiol Receptor Translocated into Nuclei Is Dephosphorylated and Released into Cytoplasm 149

TIBOR T. GLANT. Concanavalin A-Binding Link Protein in the Proteoglycan Aggregate of Hyaline Cartilage 158

SHIGEYUKI IGARASHI, HIROMICHI YONEKAWA, KANAME KAWAJIRI, JUMKO WATANABE, TERUYUKI KIMURA, MASAHIKO KODAMA, CHIKAYOSHI NAGATA, and YUSAKU TAGASHIRA. Participation of the Microsomal Electron Transport System in Mutagenic Activation of 4-Dimethylaminoazobenzene, 4-Methylaminoazobenzene and Their 3′-Methyl-Derivatives 164

J. A. BADWEY, J. T. CURNUTTE, C. B. BERDE, and M. L. KARNOVSKY. Cytochalasin E Diminishes the Lag Phase in the Release of Superoxide by Human Neutrophils 170

FRANCIS BINKLEY and SUSAN M. RICHARDSON. Effects of Fasting and Insulin on Hepatic Phosphofructokinase (PFK) 175

PETER EIGIL NIELSEN and VAGN LEICK. Specific Photoreactions between Psoralens and Yeast-$tRNA^{Phe}$ 179

I. LINDBERG, H.-Y. T. YANG, and E. COSTA. An Enkephalin-Generating Enzyme in Bovine Adrenal Medulla 186

ESTHER BRESLOW, MARTIN PAGNOZZI, and ROCHESTER TIAO-TE CO. Chemical Modification or Excision of Neurophysin Arginine-8 Is Associated with Loss of Peptide-Binding Ability 194

RON G. ROSENFELD, BHARAT B. AGGARWAL, RAYMOND L. HINTZ, and LAURA A. DOLLAR. Recombinant DNA-Derived Methionyl Human Growth Hormone Is Similar in Membrane Binding Properties to Human Pituitary Growth Hormone 202

H. JUHL, P. KRISTOFFERSEN, and V. ESMANN. Activation of Glycogen Synthase in Leukocytes Is Inhibited by the Intracellular Ca-Antagonist TMB-8 210
HANS SCHWEIGER and KARL BRAND. Interaction between Oxidative Decarboxylation of Branched Chain α-Keto Acids and Oxidative Phosphorylation in Rat Liver Mitochondria 217
H. A. ONWUBIKO, J. H. HAZZARD, R. W. NOBLE, and W. S. CAUGHEY. Demonstration of Inositol Hexaphosphate Induced Changes in Structure at Ligand Binding Sites in Carp Hemoglobin Carbonyl 223
J. ANDRE, A. M. MARCHISIO, Y. MOREL, and R. COLLU. Dopamine Receptors in the Rat Pituitary and the Transplantable Pituitary Tumor MtTF$_4$: Effect of Chronic Treatment with Oestradiol 229
MANUEL RIEBER and MARY S. RIEBER. Novel Correlation between Greater Cell Adhesion to Substratum and an Increased Association of Cell Surface Proteins with Polypeptides Involved in Actin Polymerization 236
A. A. M. ROSA, J. DJIANE, L. M. HOUDEBINE, and P. A. KELLY. Stimulatory Effects of Prolactin and Anti-Prolactin Receptor Serum on Prolactin Binding Sites in Rat Liver Cells in Suspension Culture 243
ERRATUM. Volume 104, Number 3, February 11, 1982: Peter K. Working and Stanley Meizel, "Preliminary Characterization of a Mg^{2+}-ATPase in Hamster Sperm Head Membranes," pp. 1060–1065 250

Volume 106, Number 2, May 31, 1982

AUTHOR INDEX, Volume 106, Number 2, May 31, 1982 ii
JANICE R. SUFRIN, J. B. LOMBARDINI, and DENNIS D. KEITH. A Potent Inhibitor of the Enzymatic Synthesis of *S*-Adenosylmethionine 251
BRUNO BERNARD, JACQUELINE FONT, MICHELE AUBERY, and ROLAND BOURRILLON. Influence of Temperature on the Interaction of Concanavalin A with Chick Fibroblasts during Embryo Development 256
JAY W. FOX, AMY BARISH, CLIFFORD E. SNYDER, and ROLF BENZINGER. Amino Terminal Sequence of the Bacteriophage T5-Coded Gene A2 Protein 265
EDWARD J. GOETZL. The Conversion of Leukotriene C$_4$ to Isomers of Leukotriene B$_4$ by Human Eosinophil Peroxidase 270
BERNARD MALFROY and JEAN-CHARLES SCHWARTZ. Properties of "Enkephalinase" from Rat Kidney: Comparison of Dipeptidyl-Carboxypeptidase and Endopeptidase Activities . 276
I. MAVELLI, M. R. CIRIOLO, G. ROTILIO, P. DE SOLE, M. CASTORINO, and A. STABILE. Superoxide Dismutase, Glutathione Peroxidase and Catalase in Oxidative Hemolysis. A Study of Fanconi's Anemia Erythrocytes 286
LEENA ALHONEN-HONGISTO, PAULI SEPPANEN, ERKKI HOLTTA, and JUHANI JANNE. Replacement of Natural Polyamines by Cadaverine and Its Aminopropyl Derivatives in Ehrlich Ascites Carcinoma Cells 291
MICHAEL BALKIN, ANN MELBER, and MARTIN ROGINSKY. Inhibition of Protein Synthesis on Homologous and Heterologous Desensitization in the Rat Adipocyte 298
VAITHILINGAM SEKAR, VALERIE J. ATMAR, MATHILDE KRIM, and GLENN D. KUEHN. Interferon Induction of Polyamine-Dependent Protein Kinase Activity in Ehrlich Ascites Tumor Cells 305
BIANCA M. CONTI-TRONCONI, MICHAEL W. HUNKAPILLER, JON S. LINDSTROM, and MICHAEL A. RAFTERY. Amino Acid Sequence Homology between "α" Subunits from *Torpedo* and *Electrophorus* Acetylcholine Receptor 312
M. B. SANKARAM and K. R. K. EASWARAN. Interaction of Manganese(II) with Valinomycin: Observation of Mixed Complexes 319
HANS-JOACHIM GABIUS and FRIEDRICH CRAMER. Purification and Subunit Structure of Phenylalanyl-tRNA Synthetase from Hen Liver Mitochondria 325
JEAN-PIERRE CARTRON, MICHEL KORNPROBST, MARGUERITE LEMONNIER, PATRICK LAMBIN, FRIEDRICH PILLER, and CHARLES SALMON. Isolation from Human Urines of a Mucin with Blood Group Sd^a Activity 331
MICHAEL E. BEMBENEK, DAVID H. WILLIS, JR., and J. P. LIBERTI. The Effect of Insulin on Collagen Production in Isolated Chondrosarcoma Chondrocytes 338
HAROLD KOENIG, ALFRED GOLDSTONE, and CHUNG Y. LU. Testosterone Induces a Rapid Stimulation of Endocytosis, Amino Acid and Hexose Transport in Mouse Kidney Cortex 346
KURT STROMBERG, DENNIS A. PIGOTT, JANE E. RANCHALIS, and DANIEL R. TWARDZIK. Human Term Placenta Contains Transforming Growth Factors 354
ROSELYNE DEFAY, MONIQUE E. ASTRUC, SAMIA ROUSSILLON, BERNARD DESCOMPS, and ANDRE CRASTES DE PAULET. DNA Synthesis and 3-Hydroxy-3-methylglutaryl CoA Reductase Activity in PHA Stimulated Human Lymphocytes: A Comparative Study of the Inhibitory Effects of Some Oxysterols with Special Reference to Side Chain Hydroxylated Derivatives 362
RUSSELL SANETO and HOWARD M. JOHNSON. Interferon Inhibition of Hexose Monophosphate Shunt Activity as the Mechanism of Blocking Differentiation of a Preadipose Cell Line 373
SANDRA K. FRANK and HERBERT J. FROMM. Effect of Streptozotocin-Induced Diabetes on the Turnover of Hexokinase II in the Rat 379
NINA K. DODD, CHARLES E. SIZER, and JACQUELINE DUPONT. Cholanoic Acids and Cholesterol 7-α-Hydroxylase Activity in Human Leucocytes 385
P. A. MURRAY, M. J. LEVINE, L. A. TABAK, and M. S. REDDY. Specificity of Salivary–Bacterial Interactions. II. Evidence for a Lectin on *Streptococcus sanguis* with Specificity for a NeuAc α 2,3GalNAc Sequence 390

FUMIO OGATA and YOSHIHEI HIRASAWA. Heparin-Released Triglyceride Lipase from Chang Liver Cells 397
TIP W. LOO and P. D. BRAGG. The DCCD-Binding Polypeptide Is Close to the F_1 ATPase-Binding Site on the Cytoplasmic Surface of the Cell Membrane of *Escherichia coli* 400
JAMES R. WHITE and HEATHER N. YEOWELL. Iron Enhances the Bactericidal Action of Streptonigrin 407
RENU A. HELLER, PAMELA HOY, and PATRICIA P. JONES. Development of Monoclonal Antibodies to 3-Hydroxy-3-methylglutaryl-coenzyme A Reductase 412
JULIAN N. KANFER. Contribution of Substrates for Phospholipid N Methylation by the Base Exchange Enzyme in Rat Brain Microsomes 422
Y. ETO, T. TOKORO, I. LIEBAERS, and E. VAMOS. Biochemical Characterization of Neonatal Multiple Sulfatase Deficient (MSD) Disorder Cultured Skin Fibroblasts 429
RUSSELL J. RODRIGUEZ, FRED R. TAYLOR, and LEO W. PARKS. A Requirement for Ergosterol to Permit Growth of Yeast Sterol Auxotrophs on Cholestanol 435
CATHERINE KOO, ROBERT J. LEFKOWITZ, and RALPH SNYDERMAN. The Oligopeptide Chemotactic Factor Receptor on Human Polymorphonuclear Leukocyte Membranes Exists in Two Affinity States 442
DANIEL I. ARNON, HARRY Y. TSUJIMOTO, and GEORGE M.-S. TANG. Different Roles of Plastoquinone in the Photoreduction of Ferredoxin and of Membrane-Bound Iron–Sulfur Centers of Chloroplasts 450
LAURENCE ELIAS, JONATHAN LONGMIRE, ALLAN WOOD, and ROBERT RATLIFF. Phosphorylation of Terminal Deoxynucleotidyl Transferase in Leukemic Cells 458
H. DANIELL and C. A. REBEIZ. Chloroplast Culture IX Chlorophyll(ide) *a* Bioxynthesis *in Vitro* at Rates Higher Than *in Vivo* 466
PHILIP J. SPAGNUOLO, MICHAEL M. LEDERMAN, JOHN SCHILTZ, JERROLD ELLNER, and LLOYD CULP. A Possible Role for Cold Insoluble Globulin in Chemotactic Factor Mediated Polymorphonuclear Leukocyte Adherence to Plastic 471
A. CHRISTIE KING and PEDRO CUATRECASAS. Exposure of Cells to an Acidic Environment Reverses the Inhibition by Methylamine of the Mitogenic Response to Epidermal Growth Factor 479
LISARDO BOSCA, JUAN J. ARAGON, and ALBERTO SOLS. Specific Activation by Fructose 2,6-Bisphosphate and Inhibition by P-*Enol*pyruvate of Ascites Tumor Phosphofructokinase ... 486
ALLAN J. HANCE, JEFFREY LEE, and MARK FEITELSON. The M1 and M2 Isozymes of Pyruvate Kinase Are the Products of the Same Gene 492
BRUCE A. HARRIS and WILLIAM PLUNKETT. Termination of RNA by Nucleotides of 9- β -D-Xylofuranosyladenine 500
HENRY I. MOSBERG, ROBIN HURST, VICTOR J. HRUBY, JAMES J. GALLIGAN, THOMAS F. BURKS, KELVIN GEE, and HENRY I. YAMAMURA. [D-Pen^2, L-Cys^5]Enkephalinamide and [D-Pen^2, *D*-Cys^5]Enkephalinamide, Conformationally Constrained Cyclic Enkephalinamide Analogs with Delta Receptor Specificity 506
YASUNORI KANAHO and TATSUZO FUJII. Effect of Some Amphiphilic Drugs on the Membrane Morphology and Aggregation of Rabbit Platelets 513
MARTIN DIATEWA, YVES BOULANGER, and ANDRE J. C. STAHL. Comparison of Yeast Mitochondrial Phe-tRNA Synthetase Subunits to Their Cytoplasmic Counterparts: Isolation and Determination of Amino Acid Compositions 520
YOSHITERU HATA and MASAMICHI WATANABE. A New Metabolic Reaction of Diaziridines by Rat Liver Microsomes 526
HARALD F. TEUTSCH and OLIVER H. LOWRY. Sex Specific Regional Differences in Hepatic Glucokinase Activity 533
H. C. GOOI and TEN FEIZI. Natural Antibodies as Contaminants of Hydridoma Products 539
SYNNOVE SUNDELL-BERGMAN and KARL J. JOHANSON. Impaired Repair Capacity of DNA Strand Breaks Induced by ^{125}I-Triiodothyronine in Chinese Hamster Cells 546
S. G. SPENCER and J. M. BREWER. Substrate-Dependent Inhibition of Yeast Enolase by Fluoride 553
GARRY KING and PETER E. WRIGHT. A Two-Dimensional NMR Method for Assignment of Imidazole Ring Proton Resonances of Histidine Residues in Proteins 559
T. LECOMPTE, J. RADON, M. CHIGNARD, B. B. VARGAFTIG, and F. DRAY. Interference of Transmethylation Inhibitors with Thromboxane Synthesis in Rat Platelets 566
JEAN-PIERRE ABITA, CHRISTIANE GAUVILLE, and FORTUNA SAAL. Characterization of Insulin Receptors in Human Promyelocytic Leukemia Cell HL60 574
DANIEL RICQUIER, CHI-SHUI LIN, and MARTIN KLINGENBERG. Isolation of the GDP Binding Protein from Brown Adipose Tissue Mitochondria of Several Animals and Amino Acid Composition Study in Rat 582
NORIO KATOH and J. F. KUO. Subcellular Distribution of Phospholipid-Sensitive Calcium-Dependent Protein Kinase in Guinea Pig Heart, Spleen and Cerebral Cortex, and Inhibition of the Enzyme by Triton X-100 590
TOSHIRO MATSUNAGA, AKIRA OKUBO, SUNAO YAMAZAKI, and SHOZO TODA. ^{31}P Nuclear Magnetic Resonance Analysis of *Penicillium ochro-chloron* 596
P. J. VAN BLADEREN, R. N. ARMSTRONG, D. COBB, D. R. THAKKER, D. E. RYAN, P. E. THOMAS, N. D. SHARMA, D. R. BOYD, W. LEVIN, and D. M. JERINA. Stereoselective Formation of Benz[*a*]Anthracene (+)-(5*S*,6*R*)-Oxide and (+)-(8*R*,9*S*)-Oxide by a Highly Purified and Reconstituted System Containing Cytochrome *P*-450c 602
J. LEGALL, P. O. LJUNGDAHL, I. MOURA, H. D. PECK, JR., A. V. XAVIER, J. J. G. MOURA, M. TEIXERA, B. H. HUYNH, and D. V. DERVARTANIAN. The Presence of Redox-Sensitive Nickel in the Periplasmic Hydrogenase from *Desulfovibrio gigas* 610
ITARU KOJIMA, HIROSHI INANO, and BUN-ICHI TAMAOKI. The Final Step of Aldosterone Biosynthesis Is Catalyzed by an NADPH-Dependent and Molecular Oxygen-Requiring Enzyme 617
MAGNUS INGELMAN-SUNDBERG and GUNILLA EKSTROM. Aniline Is Hydroxylated by the Cytochrome *P*-450-Dependent Hydroxyl Radical-Mediated Oxygenation Mechanism 625
SHINGO TAJIMA and SHELDON R. PINNELL. Regulation of Collagen Synthesis by Ascorbic Acid. Ascorbic Acid Increases Type I Procollagen mRNA 632
MONIQUE DECASTEL, ANH-TUAN TRAN, and JEAN-PIERRE FRENOY. Binding of 4-Methylumbelliferyl-Galactosides to Peanut Agglutinin 638

D. SOMJEN, G. J. SOMJEN, A. HARELL, G. L. MECHANIC, and I. BINDERMAN. Partial Characterization of a Specific High Affinity Binding Macromolecule for 24*R*,25 Dihydroxyvitamin D_3 in Differentiating Skeletal Mesenchyme 644

Information for Contributors

BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS is devoted to the rapid dissemination of timely and significant observations in the diverse fields of modern experimental biology. Manuscripts submitted should be so written as to emphasize clearly the novel aspects of the information reported.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Manuscripts in duplicate may be sent to any one of the editors whose names and addresses are listed on the inside front cover. To assist us in ensuring rapid processing of your article, please submit a signed photocopy of the copyright assignment form which appears as page 3 of this "Information" along with your manuscript. (This form will not be binding if your manuscript is not accepted for publication in BBRC.) *In the case of rejected manuscripts only one copy of the manuscript will be returned to the author.*

To ensure rapid and accurate publication, it is essential that manuscripts conform to the instructions which follow. Manuscripts which are not in accordance with these specifications may be returned.

Preparation of Manuscripts

Article length should not exceed 5 typewritten pages, double-spaced on 8.5 × 11-in. high-quality paper (the complete manuscript, including space occupied by figures and tables, should not exceed 8 pages).

Summary. Each article must be preceded by a brief summary, typed single-spaced, not exceeding 10 lines (approximately 100-150 words). This paragraph should adequately summarize the pertinent findings of the paper.

Typing. Articles are reproduced directly from the submitted manuscript as camera-ready copy. Manuscripts must therefore be typewritten on good quality white bond paper. A black silk or carbon typewriter ribbon should be used. Special care should be taken to ensure a sharp clean impression of letters throughout. Use of an electric typewriter is strongly recommended. Erasures should be avoided. Care must also be taken to avoid errors in spelling, word division and punctuation. **No changes may be made in manuscripts after acceptance.**

Manuscripts should be double-spaced on one side of the sheet; **methods, references, footnotes and figure legends should be single-spaced**. Typing area of the page must be as close as possible to 6.5 in. wide and 9.5 in. long.

Symbols and Abbreviations defined in the IUPAC-IUB Document No. 1 (*Arch. Biochem. Biophys.* (1966) **115**, 1-12) may be used without definition. Use of all other abbreviations and symbols is to be avoided. When abbreviations are essential, they should be consistent with the form and style of the above document and **must be defined in a single footnote and typed on a separate page**, rather than in the text. Such abbreviations **must not** be used in the Summary.

Enzyme names should not be abbreviated except when the substrate has an approved abbreviation (e.g. ATPase). Use the Enzyme Commission ("EC") code number when available.

Isotopes should be styled following the recommendations of the IUB Commission of Editors of Biochemical Journals. The symbol of the isotope introduced should be placed in square brackets directly attached to the front of the name (e.g., [^{32}P]CMP). Note that the isotope number should only be used as a (superior) prefix to the atomic symbol, not to an abbreviation.

In the Methods section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiments described. Any relevant safety precautions should be described; if an accepted code of practice has been followed, a reference to the relevant standards should be given.

For further information regarding nomenclature authors are advised to consult the Instructions to Authors of the **Archives of Biochemistry and Biophysics** (1980) **199**, v-xxii. Reprints are available from the Publisher.

Footnotes, references, and figure legends should be typed single-spaced on separate pages.

Illustrations and Tables. **Do not attempt to insert figures, figure legends or tables into the text.** This will be done by the Publisher.

All drawings should be clearly labeled in black ink in a manner suitable for direct reproduction (Leroy lettering size 120 or 140). Do not use press-on lettering: typewritten lettering is not acceptable.

Figures will be reduced to fit within the type area of the page (approximately 5 × 8 in.); the original drawings should be no larger than 8.5 × 11 in.

Glossy photographs of drawings are acceptable provided they are sharp, clear prints with an even *black* density.

Mathematical or chemical symbols that cannot be typed should be inked in carefully in black. Structural formulas should be drawn in black ink.

Illustrations and tables should be submitted on separate sheets.

Page Numbers and Headings. Page numbers should be typed at the top of the page.

The title of the paper should be typed in capital letters near the top of the first page, with the name(s) and affiliation(s) of the author(s) typed just below. Headings within the article should be arranged according to their relative importance.

References to the literature should be cited by the number in parentheses in the text and listed in numerical order in a single-spaced typed list placed at the end of the manuscript. Abbreviations of journals should conform to those of *Chemical Abstracts Service Source Index, 1969*. Note the following examples.

For a journal article:

1. Chattorai, D.K., and Bull, H.B. (1971) Arch. Biochem. Biophys. 142, 363–370.

For a book by one or more authors:

2. Robinson, G. A., Sutherland, E. W., and Butcher, E. (1971) Cyclic AMP, pp. 298–302, Academic Press, New York.

Note that inclusive pagination must be given.

Acknowledgment of Receipt. Authors desiring acknowledgment of receipt of manuscript should enclose a stamped self-addressed card.

Reprints. Reprint order forms, with price lists, are sent to the authors immediately upon acceptance of their manuscript.

Manuscript Title _____

_____

Authors _____

I hereby confirm the assignment of all copyrights in and to the manuscript named above in all forms and media to Academic Press effective if and when it is accepted for publication by Academic Press. (For U.S. government employee authors, this provision applies only to the extent to which copyright is transferable.) I also confirm that the manuscript contains no material the publication of which would violate any copyright or other personal or proprietary right of any person or entity, and I acknowledge that Academic Press is relying on this letter in publishing this manuscript.

_____ _____

Date Signed

_____

Name (and title if not author)

To be signed by at least one of the authors (who has obtained the assent of the others, if any). In the case of a "work made for hire" (a work prepared by an employee within the scope of his or her employment or commissioned as a work for hire under a written agreement), an authorized representative of the employer should sign.

Please note: Manuscripts cannot be processed for publication until the Publisher has received this signed form.

If the manuscript is not published by Academic Press, this letter will not take effect.
